Patriot Blue	Turquoise	Slate Blue	Green	Pine Green	Forest green

RetroPlate has always worked successfully with bare concrete, both old and new; but now in conjunction with the new generation of solvent-based dyes, it can deliver both the colors of the rainbow, and the earthen colors associated with acid stains. When combined with RetroPlate you can now realize the benefits of solvent-based dyes that are manufactured and shipped in a dry powder form. The AmeriPolish Dye distributed by RetroPlate can be applied alone or in conjunction with acid stain as a highlight. Your imagination can now create beautiful floors that reflect the inherent beauty of natural stone, at a fraction of the cost.

Suppliers of the RetroPlate System: **RetroPlate** **RetroClean** **RetroPel** **AmeriPolish Dye**
