

MID-ATLANTIC COATINGS INC.

PROTECT YOUR _____

HIGH PERFORMANCE COATINGS | POLISHED CONCRETE | CHEMICAL DENSIFICATION

When it comes to protecting and beautifying your building investment, Mid-Atlantic Coatings is the company you can trust for cost effective and low maintenance protective coating solutions.

One of our product solutions is the Ashford Formula. The Ashford Formula performs the chemical densification of concrete. Instead of simply coating the top of the concrete slab (which would require repeated applications over a period of years) densification allows one application to seal the concrete for life.

There are other benefits to the Ashford Formula densification process:

- Acts as a curing agent in lieu a typical curing agent. Apply after the concrete is poured and finished, and before or after the saw cuts.
- An aesthetically pleasing marble-like sheen on the surface after (1) year of wear and maintenance.
- Minimal maintenance costs for the life of the facility.
- Provides a Hardened and Dust Proofed surface.

Ashford Formula has treated over three billion square feet of concrete. It is manufactured by Curecrete Chemicals, a company with over 50 years of experience. It is represented Independently by Mid-Atlantic Coatings, Inc. Curecrete Chemicals was the first (and still the only) company that delivers the concrete densification technology and true concrete sealing a single application. There is nothing like it in the market today.

Ashford Formula is recommended for used on the following type floors;

- Warehouse
- Parking Deck
- Dust-proofing for Computer Access Floor
- Mechanical Room

In addition to our specification assistance of the Ashford Formula, Mid-Atlantic Coatings offers the Owner/Specifier technical field service prior to and during the application process. This service is provided to ensure the quality control and value of Ashford Formula on every project. Also, Cure Crete Chemical offers a (20) material (5) year labor warranty upon request and after proper installation of the Ashford Formula by Certified Applicator.

Mid-Atlantic Coatings appreciates the opportunity to meet with you and your design professional team to further discuss the value of Ashford Formula on your next project. Please contact us at 410-409-2100 or todd@macoatings.com.

Thank you for your consideration of our products and services!

Sincerely,

G. Todd Guntner, CSI
