

Crete-Clean

PRODUCT NAME- Crete-Clean™

MANUFACTURER-

Curecrete Chemical Co. Inc.
1203 W. Spring Creek
Springville, Utah 84663 U.S.A.
Phone: (801) 489-5663
Fax: (801) 489-3307

PRODUCT DESCRIPTION-

Crete-Clean™ is a liquid floor cleaning agent specifically designed to remove surface dirt and soil from any concrete floor that has been treated with The Ashford Formula.

TECHNICAL DATA-

Form: Yellow liquid, weighing 9 Lbs. per gallon.
Flashpoint: >200°
pH: 10.0
Packaging: 55 gallon drums and 5 gallon containers.
Dilution: Three ounces (1/3 cup) of Crete-Clean per gallon of cold tap water.

LIMITATIONS-

Crete-Clean may not remove oil stains from concrete that has not been treated with The Ashford Formula. An additional treatment with an oil emulsifier may be necessary.

On concrete surfaces that were treated with The Ashford Formula twelve months or less, the sealing process will not have completed. During this initial process, it is possible for spills to penetrate the surface of the concrete.

In addition, for the duration of this interim period, it is important to clean and scrub The Ashford Formula treated concrete surface floor frequently and regularly. This cleaning will gradually cause any stains to leach out of the floor surface. It will also accelerate the sealing action of The Ashford Formula preventing future stains.

As The Ashford Formula continues to react with the concrete, contaminants will be forced up and out of the concrete surface as the cleaning continues over time.

NOTE: This will only occur because of regular and frequent housekeeping. The longer oil is allowed to stand on the concrete surface, the more difficult it will be to remove.

DIRECTIONS-

Sweep the area that is to be cleaned. Crete-Clean can be applied by way of a mop, automatic scrubber or other means. Remove any excess diluted Crete-Clean and allow the concrete surface to air-dry. For best results, on concrete that has been treated with The Ashford Formula, burnish the surface with aggressive pads.

AVAILABILITY AND COST-

Crete-Clean is manufactured exclusively by Curecrete Chemical Company, Inc. It is distributed through a network of regional factory warehouses by Curecrete Distribution, Inc. and its network of area sales representatives. For pricing information, please call 1-800-998-5664.

WARRANTY-

Curecrete Chemical Co. warrants this product to be free from any manufacturing defects.
