

DECO-FLECK

Layers of Brilliant Color. And the Future of Brilliant Flooring.

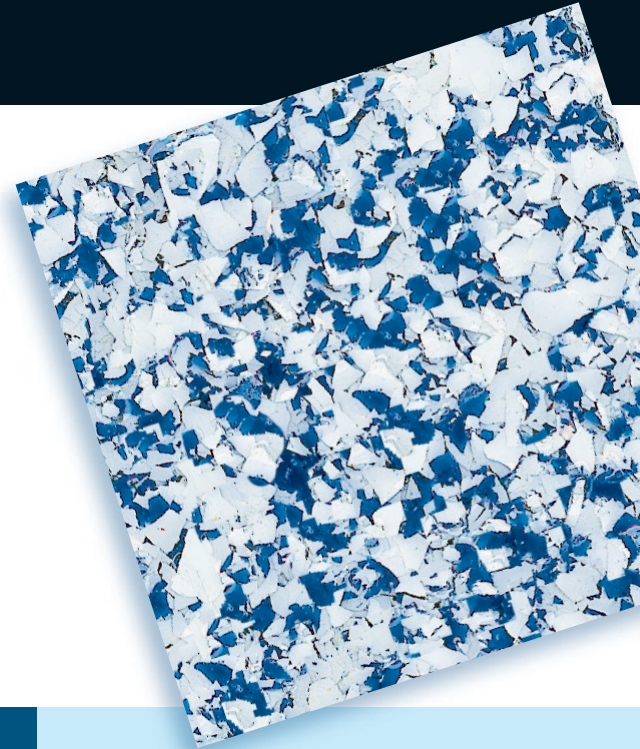

**Deco-Fleck® represents everything a floor should be.
Attractive. Practical. Lasting.**

Deco-Fleck is StrataShield's advanced flooring technology at its best. Multicolored vinyl flakes are locked into a clear liquid epoxy for amazing depth of color. A new formulation with polyfunctional amine bonding gives Deco-Fleck extra durability. So you get a beautiful finish that resists abrasion and mild chemicals for years to come.

Designed to be part of a complete StrataShield flooring system.

The beauty of StrataShield floor coatings is how well they work together to create the precise floor your application demands.

Deco-Fleck was formulated to be an intermediate broadcast coat between Series 201 Epoxoprime primer and a topcoat of Series 284 Deco-Clear. With this advanced technology system, you receive the best performance flooring has to offer. Not to mention a beautiful finish that lasts for years.

A D V A N T A G E S
