

For a floor that protects as good as it looks.

Flooring protection for the automotive industry.

When it comes to making a good impression, every part of your facility counts—from the lobby and showroom to the service and maintenance areas. Not to mention your floors. These days, clean, beautiful floors that shine are as important to customers as fresh pots of coffee and comfortable chairs. And thanks to StrataShield floor coatings, a clean, beautiful floor is easier than ever to achieve.

StrataShield advanced floor technology from Tnemec offers affordable coating solutions for concrete floors throughout automotive facilities. Used to beautify some of the finest showroom floors around, StrataShield also protects repair shops and service areas from oil spills, stains, tire residue and salt. So whether you're looking to enhance

your showroom floor or to protect your service and maintenance areas, StrataShield systems offer both the beauty and protection you want. And the durability you need.

If your facility's floor is prone to damage caused by dropped tools and equipment, StrataShield also offers heavy-duty flooring products for increased impact resistance. In addition to protecting your floor from everyday problems, these products also shield against chipping, gauging and scratching—problems that bare concrete can't handle.

From thin film epoxy and urethane systems to high-build laminates and mortars, StrataShield has a flooring system that's right for your facility. Your local Tnemec representative

FEATURES:

- Smooth, orange-peel and non-slip finishes
- Chemical and stain resistant
- Easy to clean and maintain
- Light reflective sheen
- Enhanced durability
- Many color choices

can provide you with a free facility evaluation and help you design a system to rehab existing floors and/or coat new concrete. Tnemec can also recommend a qualified flooring contractor to apply the flooring system you choose. For more information on how our products can enhance and protect your floors, call 1.866.4STRATA. Or visit www.stratashield.com.

LEWIS TOYOTA IN TOPEKA, KS SERIES 201/SERIES 281/SERIES 291

The mechanic's work area of Lewis Toyota is often visible to customers. To maintain its showroom appearance in spite of dropped tools, spilled petroleum products and high exhaust temperatures, an enduring StrataShield flooring system was specified.

MIDLAND ATC IN MIDLAND, TX SERIES 201/SERIES 237/SERIES 280

When this old Sears building was converted into an automotive technology-training center, the floor had many non-structural cracks and damage from previous remodeling projects. Series 237 Power-Tread transformed the old concrete floor into a new floor for approximately a third the cost of pouring new concrete.
